

SUMMARY

Entry-level web developer with 15+ years of providing full service construction, home renovation, and metal fabrication services in a timely manner, all while ensuring customer needs are addressed. Knowledgeable in Java and Javascript as well as Spring Boot and React. Seeking a professional opportunity to use supervisory skills, collaborative ability, and rapid grasp of new concepts, in a technical web development role.

LANGUAGES | FRAMEWORKS | TOOLS

Java, Javascript, SQL | Spring Boot, React | IntelliJ, VS Code

EXPERIENCE

Recipe Book — LaunchCode Capstone Project

- Developed a digital recipe book that allows a user to search for new recipes online and enter their own recipes to be saved for future use
- Website addresses a need for users to combine searched for recipes and personal recipes together
- Created login and registrations pages to authenticate users and create user profiles
- Built a feature to save searched recipes to user profile to be readily accessible
- Added sorting functionality to facilitate finding recipes faster
- Tech Stack: React , Spring Boot, MySQL

Operations Assistant — Your Safety Net

December 2022 - Present

- Manage coordination for patient transport to and from medical appointments
- Handle billing entries in excess of \$800,000
- Oversee a team of 15 drivers and communicate all daily operational information

Owner — Rheinheimer Home Improvement

June 2008 - Present

- Design and build projects ranging from bathroom remodels to entire homes
- Complete work across many trades including carpentry, electrical, plumbing, drywall, flooring, flatwork, excavation, and landscaping
- Communicate with customers to keep projects within time and budget constraints
- Manage all forms and tax documents to comply with federal/state requirements

Master Welder — Becket Fabrication

March 2012 - September 2016

- Supervised a fabrication team and delegated work on all projects to ensure delivery schedules were maintained across multiple projects
- Interpreted design drawings and fabricated all necessary components within strict tolerances
- Field measured installation locations to ensure accuracy and fitment of all components including structural members, stairs, and guard rails
